

**TRI-PAR ESTATES PARK AND RECREATION DISTRICT
POLICY AND PROCEDURE MANUAL**

ITEM 5.06 POOL AND SPA HEATING

A. POOL:

1. Tri-Par Estates will maintain heating of the pool at 85 degrees when it is feasible to do so. When outside temperature is expected to go too low at night, or stay too low during the day, heating will not be attempted.

2. The water is heated by electric heat pumps, and gas heaters. When feasible to maintain 85 degree water temperature, the heat pumps will be set at 85 degrees, and the gas heaters at 83 degrees to supplement when needed.

3. Decisions regarding heating will be made by the Trustee Chair and/or the Buildings & Grounds Trustee. They shall endeavor to keep the pool heated at any time suitable swimming conditions prevail.

B. SPA:

1. Spa water temperature will be maintained at 102 degrees, when it is feasible to do so. Heating may be reduced when outside temperatures are too low. Decisions regarding heating will be made by the Trustee Chair and/or the Buildings & Grounds Trustee.

Adopted by Trustees – 10/20/2015; Amended 10-17-23
